07 / DESIGN LANGUAGE DNA

Design Language

Dark-mode first **Lime-green accent** **Brutalist scale** **Scroll-driven motion** **Web3 / Crypto aesthetic** **High contrast** **Editorial rhythm** **Minimal noise**

Traill sits at the intersection of brutalist typographic scale and restrained dark-mode minimalism. Its visual language borrows from crypto/web3 branding conventions — near-black backgrounds, electric lime accents, monospaced detail labels — while maintaining enough editorial whitespace to feel premium. Every interactive element reinforces the accent color as the single 'live wire' in the palette.
